Labs from Visual Design

Hey it's the first lab we did! This was supposed to teach us how to move, manipulate, and make selections.

Wonder what we have done since then....

Isn't that Lab 8?
Woah! we were supposed to fix the images where there were imperfections.

They look right, dont they?

Well if it isn't lab 5 or 6, hard to tell...
We made an image on a piece of paper and coloured over it in Photoshop using vectors.

What else will we see?

Isn't that Doggo I see?
This was lab 2 where we learned the different ways we can manipulate colour of an image.

What else will be manipulated?

800x600 isn't a good resolution
With this Lab 7 we took a picture and applied different filters to it.

Lab 4
October 28, 2016

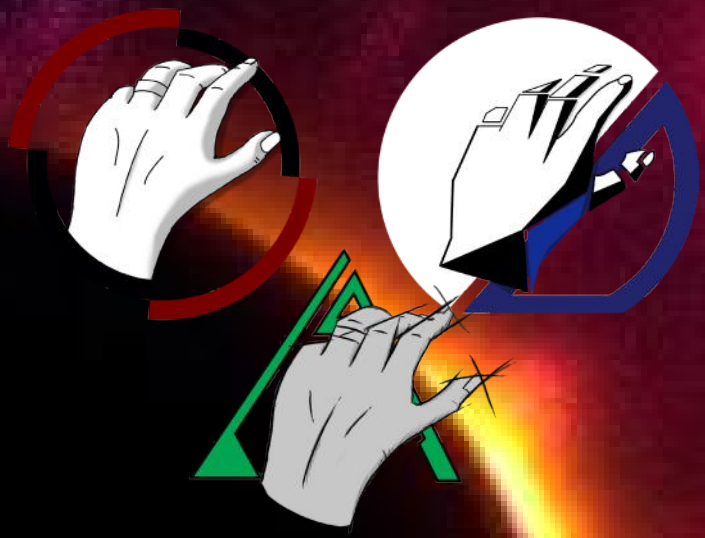
Hey I actually went outside?!
This lab we had to go outside to take pictures of a subject at Eye-level, a Close-up, a Low-POV, a High-POV, and a landscape shot.

Projects from Visual Design

Could it be?!
Project 1 was where we learned how to use masks.

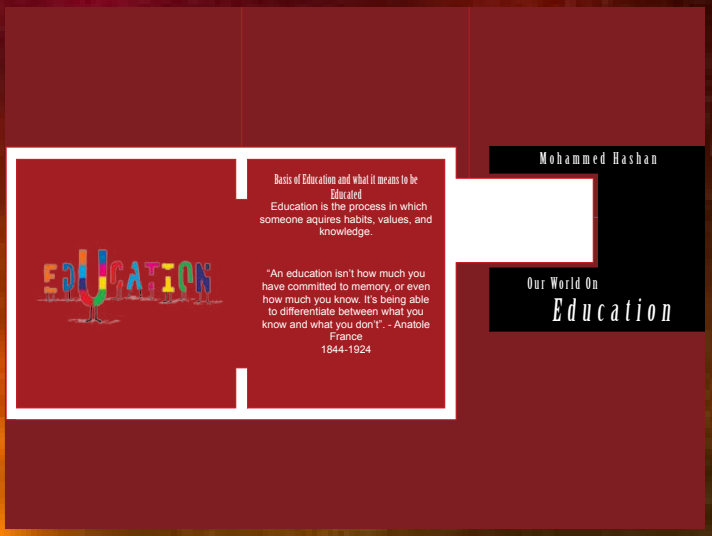
The name is 2... Project 2
This project we learned how to make collages, and outlines... as you can see only the collage is shown.

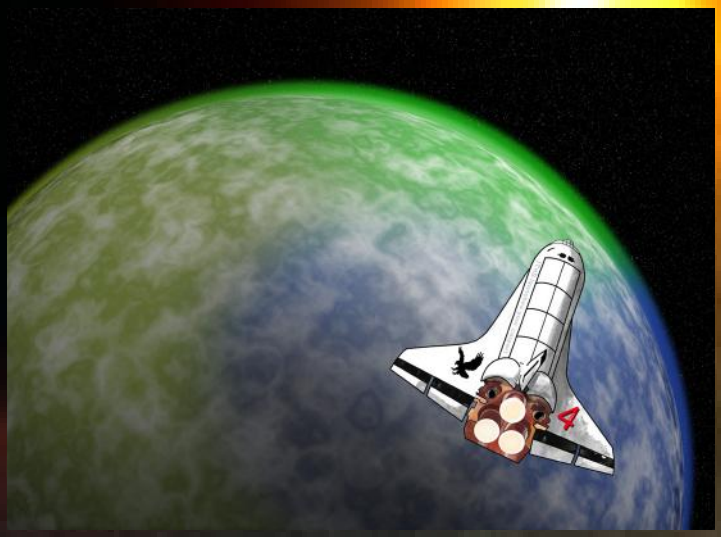
Hey Kids!
It's Project 3! where we *tried* to restore a damaged photo. Emphasis on tried.



Logos?
In Project 4 we made three logos of our own design. Those are an example on the left

Neato!
Project 5, we made brochures for a cause we believed was important





Project 6?
We aren't finshed with that...yet
Wait isn't that was is happening now?! Woah this is meta
This project we had to make a yearbook for our CTE class (Web if you haven't guessed).

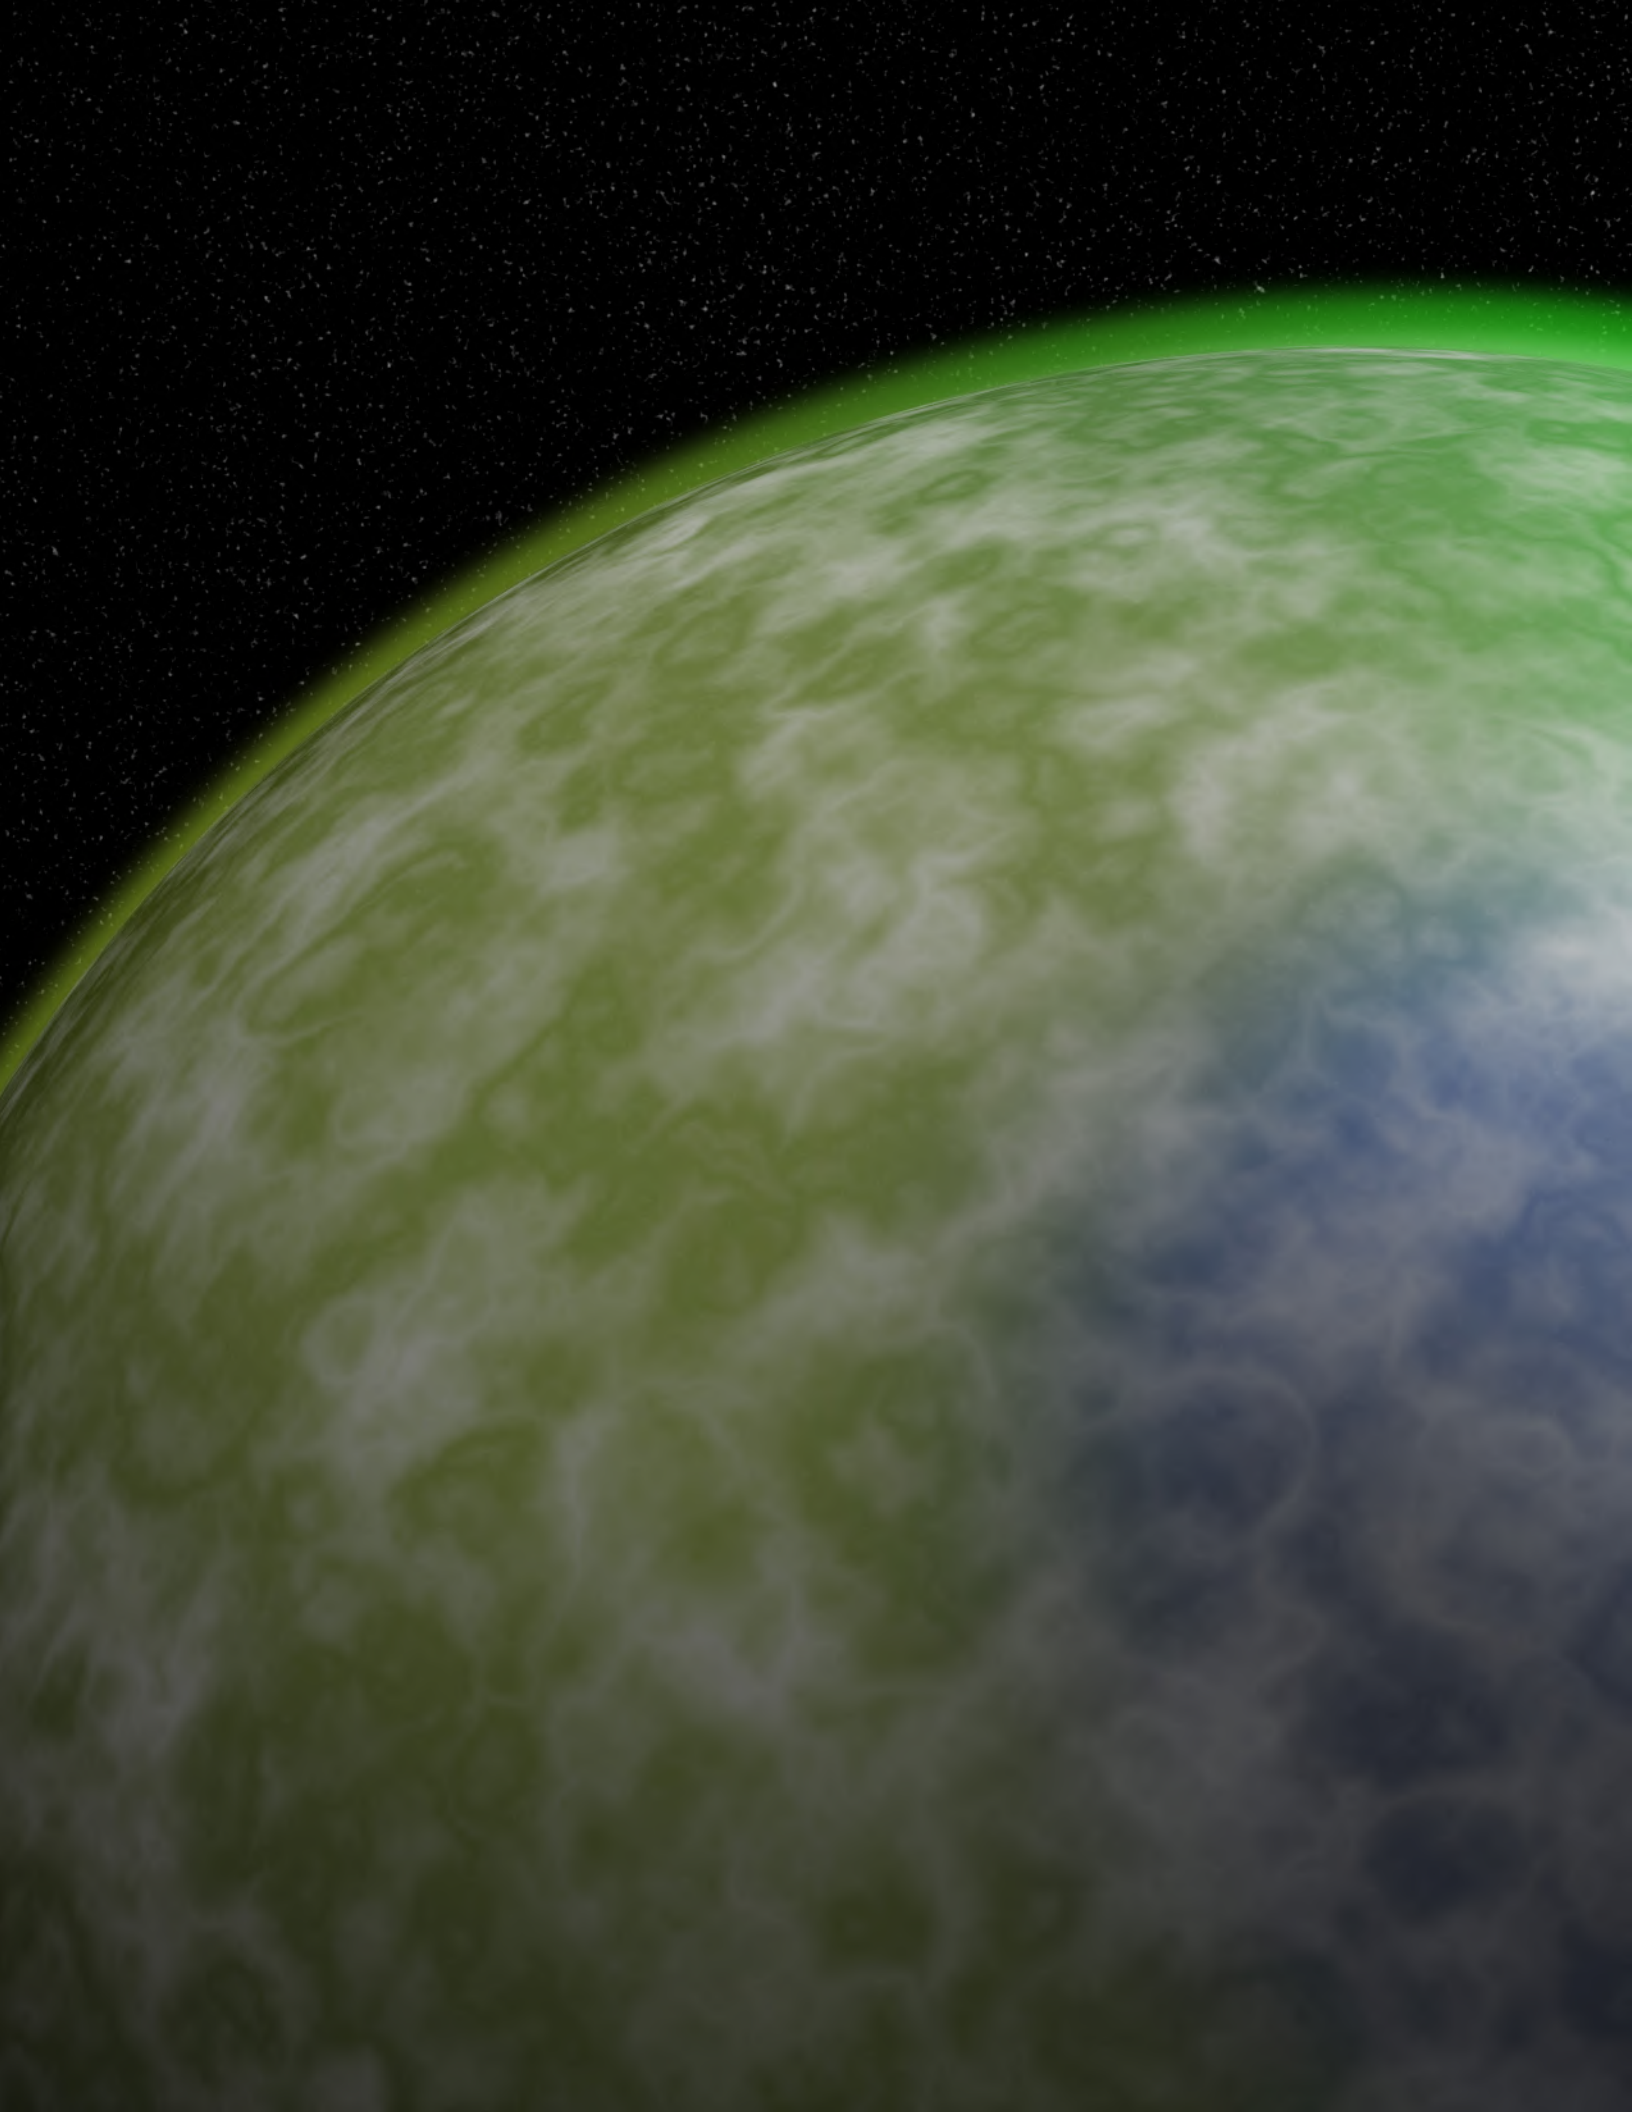
CONGRADULATIONS TO CLASS OF 2019

Stay safe and Remember:

Drink water, you have to
stay hydrated. It's Important!

Some things to note:


- If you wash your hands your hands get wet
- Bill gates isn't actually a gate
- Mayonnaise isn't an Instrument
- Soy milk isn't milk indtroducing it's self in spanish
